

Great Vision *for*
Great Machines

We develop, design and deliver the fastest and the most accurate smart camera based solutions for pulp, paper and print industries worldwide.

Procemex has been a pioneer in the visualization of production problems in paper machines since 1990 and in printing processes since 2004.

Procemex uses and produces hi-tech: design smart cameras and software platforms technology, every Procemex product and system is uncompromisingly designed to improve customer competitiveness and productivity. With our over 20-year experience we can help you to secure your product quality and minimize expensive production downtime.

- founded in 2000
- over 60 employees
- 1/3 working in R&D
- deliveries of approx. 600 solutions with over 7000 cameras
- Branches in Finland (Jyväskylä & Tampere), Germany, China & USA.

Our Solutions

Procemex is your single source machine vision solutions supplier.

Our engineers design and customize a vision solution that's right for you.

We help you to deliver superior results.

Pulp, Paper & Board

PAPER MACHINE

- Web monitoring
- Web inspection
- Forming section analysis
- Pick-up web inspection
- Formation measurement
- Mill wide system integration

WINDER

- Winder control
- Web monitoring
- Web inspection
- Mill wide system integration
- Procemex web access converter integration

SHEETER

- Web monitoring
- Web inspection
- Reject gate control
- Mill wide system integration

REAM WRAPPER

- Quality inspection
- Reject gate control
- Mill wide system integration
- Ream wrap inspection

ROLL WRAPPING

- Customer roll wrap inspection
- Mill wide system integration

PULP LINES

- Web monitoring
- Web inspection
- Dirt counting according to ISO/TAPPI standards
- Pick-up web inspection
- Mill wide system integration

Print

- Web monitoring system
- Web inspection system
- Print quality inspection
- Wash cycle optimizer
- Machine vision solutions

Support & Service

Our team of experts is at your service 24/7 - we provide both remote and on-site support services that help you maintain high quality imaging performance.
